

Quaprix Technologies

Designation: Web Developer

Experience: 3+ Years

Job: Full Time - Contract (Remote)

Roles & Responsibilities:

- ❖ **Chrome Extension Development:** Design, develop, and maintain Chrome extensions that automate various aspects of job posting, such as filling out forms, submitting applications, or scraping job information from websites.
- ❖ **Technical Expertise:** Possess strong proficiency in web development technologies such as HTML, CSS, JavaScript, and the Chrome Extension API. Understand the nuances of browser automation and interacting with web pages programmatically.
- ❖ **Requirement Analysis:** Collaborate with stakeholders to understand the specific requirements for automating job posting tasks. Analyze existing workflows and identify opportunities for automation.
- ❖ **User Experience (UX) Design:** Ensure that the Chrome extension provides a user-friendly experience for both job seekers and recruiters. Design intuitive interfaces and workflows that streamline the job posting process.
- ❖ **Integration with Job Platforms:** Integrate the Chrome extension with various job platforms and websites to facilitate seamless automation of job posting tasks. Handle authentication, data synchronization, and other integration challenges.
- ❖ **Testing and Quality Assurance:** Conduct thorough testing of the Chrome extension to identify and fix bugs, ensure compatibility across different browser versions, and validate the accuracy of automated job postings.
- ❖ **Security Considerations:** Implement security best practices to safeguard user data and prevent unauthorized access or misuse of the Chrome extension. Handle sensitive information such as login credentials securely.
