Quaprix Technologies

Job Title: QA Engineer - Manual+Automation

Experience: 3+ years

Expected Notice Period: 1 Week

Shift: (GMT+01:00) UK (BST)

Opportunity Type: Remote

Placement Type: Contractual

Contract Duration: Full-Time, 12 months

Primary Skills: Selenium, Appium, API, Java, Python

Nice to have: Knowledge with Playwright**,** Javascript and Typescript

Assessment: Communication and Technical Skills

About the Job:

We're looking for a QA Engineer with at least 3 years of experience. If you're passionate about your work, eager to learn and grow, and committed to delivering exceptional results, we want to hear from you. In this role, you'll be responsible for leading the testing of our applications, ensuring their quality and reliability. You'll work closely with the development team, design and execute test plans, and develop and execute test scripts.

Roles & Responsibilities:

- Manual and automation testing

- Ensure quality and reliability of software applications

- Design and execute test plans

Quaprix Technologies

- Develop and maintain test automation frameworks

- Develop and execute test scripts

- Collaborate with the development team

- Balance fast execution and building for scale

- Uphold high standards and focus on ownership

Process Follow-ups:

Our team will shortlist you for an assessment. We'll match you with the client after an internal technical round. Finally, you'll have a quick interview with the client to land your dream job.

About Quaprix Technologies:

At Quaprix Technologies, we provide top-notch IT services to small businesses. We believe in building long-lasting relationships with our clients and helping them achieve their goals. Our goal is to make hiring reliable, simple, and fast.

Ready for a New Challenge?

Apply today and take your career to the next level. We're waiting for you!

(Note: More opportunities available depending on assessments.)
